RELIABLE CONTROLS WITH USER-FRIENDLY SOFTWARE that is thoroughly tested with our products.

ONLY PAY FOR THE HARDWARE with no additional costs or subscriptions beyond the initial price.

IN-HOUSE US-BASED CUSTOMER SERVICE offers thorough training on the product and will walk you through initial projects.

How Does It Work?

GKOLED® Bluetooth Controls allow the lighting professional to completely customize a lighting solution for each new project. Each fixture receives a Plug & Play Controller or a Plug & Play Sensor & Controller, enabling it to be connected to the Bluetooth Mesh Network in 2 simple stages.

- 1 Initial project setup** is available via a computer web browser or a mobile app, with advanced controls accessible from the web browser.
- 2 Connecting the lights or "commissioning"** is done on the mobile app, accessible from an iPhone or iPad while in proximity to the light.

Controller

For Bluetooth connectivity, allowing the fixture to be controlled remotely.

Plug & Play Sensor & Controller

Plug & Play Controller

Wall Switch

Optional switch offers occupancy sensor, manual on/off, and dimming.
